

Just a brief update from the land department.

This week I am drafting a financial report that will eventually be given to legislatures to understand where NRCD and ed centers monies are spent. I am creating a pie chart of topics covered and numbers of ppl contacted.

The future annual reports will request this information. I will be attending the Parker Valley NRCD meeting next week.

I spent the end of last week and the weekend participating as a member of Class 27 of Project Centrl. With a colleague I presented on speaking with one voice about water security in AZ and discussed other topics such as global sales of produce from AZ. If you like you can share the Project Centrl news release attached.

I have the bulk of all reports from all NRCD's and that is wonderful. I am processing a few Oaths still but the numbers are trickling down.

I will send some range info later today or tomorrow morning. I have also attached a flyer about an upcoming workshop. I am sending this now as my email keeps shutting down today. More to come.

Jackie
